Effective barrier protection	72 hours	96 hours*
Value/price		✓

NO-STING SKIN-PREP is a liquid film forming skin protectant that minimizes stinging and forms a flexible transparent barrier that conforms to awkward areas, like elbows and heels.

NO-STING SKIN-PREP forms a transparent protective interface that helps protect the skin and can be applied to intact or damaged skin to:

- Reduce the potential for irritation associated with:
 - Urinary and fecal incontinence and other bodily fluids
 - Adhesive trauma due to tape and adhesive removal
 - Frictional forces
- Extend dressing wear time and increase the interval between dressing changes.*
- Provide a protective interface for attachment and ostomy sites, drainage tubes, and external catheters.

Sterile formula helps protect skin under transparent film around sterile insertion sites.
