positive results for life™

COPA™

Ultra-soft Foam Wound Dressing

Applications

Pressure ulcers (stage I - IV)

Venous stasis ulcers

Diabetic ulcers

Exit sites

Lacerations and abrasions

Post surgical incisions

Any wound that has moderate to heavy drainage

PROVIDES MAXIMUM PATIENT COMFORT

- Ultra-soft hydrophilic foam protects and cushions wounds
- Small pores decrease chance of tissue migration into foam dressing
- Top-sheet on COPA Plus and COPA Island allows moisture-vapor transmission and reduces chance of skin maceration

INCREASES NURSING CONVENIENCE AND EFFICIENCIES

- COPA Island dressing allows for cost effective one-step application
- Polyurethane top sheet prevents strike through
- Fenestrated foam options allow quick applications around exit sites
- High absorption rate allows for fewer dressing changes
- Excellent conformability for those hard-to-dress areas

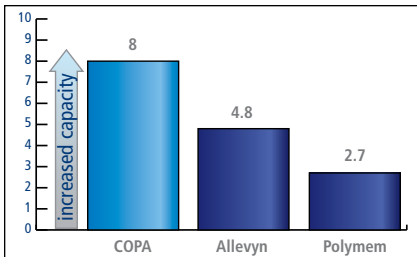

COPA, COPA Plus, and COPA Island

Hydrophilic Polyurethane Foam Dressings provide an ideal healing environment for a wide variety of wounds. These ultra-soft, highly absorbent dressings are designed to protect and cushion even highly exuding wounds.

COPA Plus and COPA Island dressings contain a polyurethane backing designed to help prevent leakage and dressing strike-through.
