The Adult Brief Sizing Guide is to be used as a guideline only. Waist and/or hip measurements should be taken by facility nursing personnel, or one of our Incontinence Care Nurse Consultants, to ensure proper sizing. Allowances must be made for gender, and certain conditions such as hernias, amputations, etc. Clinical assessment recommended for anyone over 250 lbs.

**Note:** sizing is extremely important. One of the foremost causes of leakage is improper application of improper size.
