Order

Scan and Sync Orders directly to the Portal

Create Budgets

- By GL Codes, Product Categories or Charge Codes
- Monitor budgets by YTD, Quarterly and Monthly Spending

Reports

- Run Purchase History Reports by Dates
- Items not included on the Master formulary

With the cost of medical supplies skyrocketing these days, customers are looking for more ways than ever to save money and cut costs. By creating a customized formulary, you can limit the items that are being purchased, potentially saving you hundreds to thousands of dollars each year. The Tracer Portal Dashboard allows you to see YTD spending, process quick orders, create order templates, customize order rules, build a budget and run Reports.
