

DermaGauze™

Hydrogel Impregnated Gauze Dressing

DermaGauze™ is gauze impregnated with DermaSyn™ hydrogel wound dressing. DermaGauze™ helps donate moisture to provide an optimal moist wound healing environment in dry to minimally exuding wounds. Needs a secondary dressing.

Benefits:

- Facilitates moist wound healing
- Effective once-per-day replacement for saline gauze dressings
- Supports autolytic debridement
- One-piece removal
- Latex free

Indications:

A primary dressing that may be used for the management of acute or chronic partial and full thickness wounds/ ulcers that are dry or have minimal exudate and wounds with tunneling or sinus tracts.
