

DermaFilm™ Hydrocolloid Dressing

DermaFilm is a hydrocolloid wound dressing for non-infected wounds and shallow pressure ulcers. DermaFilm maintains a moist wound environment. Available in a variety of convenient forms.

Benefits:

- Mild adhesive surface area adheres to periwound skin, but won't stick to wound bed
- Supports moist wound healing & autolytic debridement
- Provides thermal insulation and protection
- Comfortable and conformable
- Can be safely worn for several days, depending on wound condition and exudate levels
- Latex free

Indications:

May be used as a primary or secondary dressing. For the management of low exudating wounds, including:

- non-infected wounds
- partial thickness ulcers
- full-thickness ulcers
