

Flexible Unna Boot Bandages with Zinc & Calamine

Formulated
with
Calamine

ProCure Unna Boot Bandages are made of soft, non-raveling knitted gauze evenly impregnated with a non-hardening zinc oxide paste enriched with calamine to help soothe and calm irritated skin. Designed to deliver gentle, consistent compression, these bandages support venous return and maintain a moist environment that promotes optimal healing. Ideal for the ambulatory treatment of stasis leg ulcers, lymphatic edema, eczema of the leg.

The flexible, conforming design and easy-to-open seal pouch ensure comfort, convenience, and reliability in both clinical and home care settings.

Provides
Gentle
Compression
& Support
