

Calcium Alginate Dressing

**Being Needled Isn't
Always A Bad Thing.
Sometimes It Even
Makes You Stronger!**

“Needled” Fiber Construction

- Soft and comfortable
- Easy to remove
- Fast gelling
- High mannuronic acid (M) fibers
- High wet and dry strength
- Low fiber shed

SkinSafe Calcium Alginate dressings absorb moderate to heavy amounts of wound exudate and are fast-gelling to create and maintain a moist, warm wound environment.
