

LMB Air-Soft™ RESTING HAND SPLINT

Indications

- Post-surgery/injury positioning, wrist drop and finger flexor tightness
- Not recommended when moderate to severe spasticity is present

Features & Benefits

- Supports the fingers, thumb and wrist in functional/resting position
- Malleable aluminum frame allows for static progressive splinting
- Simple adjustment of the wrist and hand with no tools or heat required
- Self-wicking liner helps control perspiration and dampness to prevent skin breakdown
- Hand washable
