FREE
FORMULA

For Women and Men

Two-panel surgical rib belts help stabilize rib and sternum fractures by limiting expansion through compression. They provide comfort and encourage more controlled breathing to help reduce pain. Rib belts also provide support and compression to the muscles and soft tissues of the rib cage weakened by strain, trauma, overuse, inactivity, or surgery. Female rib belt is designed with a contoured fit around the bust line. Universally sized. Color: White.

FLA Two-Panel Surgical Rib Belts

Male Ref. No.	Female Ref. No.	Size	Fits Chest
34-4100	34-4200	Universal	24" - 48"

Measure around chest at base of the sternum

Suggested HCPCS Code A4466

FLA Three & Four-Panel Abdominal Binders
