

Wood Products

IMCO Tongue Depressors

- Disposable tongue depressors are made from high quality, close-grained white birch. This durable wood provides a smooth finish
- The white birch wood has no taste, no odor, and maintains a high tensile strength
- Besides oral use, IMCO tongue depressors are commonly used for applying ointments and other topicals, stirring and mixing medications, as well as for splinting
- Available in non-sterile adult or junior, and sterile adult

Reorder No.	Description	Packaging
