Sammons Preston®

Exercise your options with Sammons Preston's exclusive lines of therapy putty.

Economical

Sammons Preston® Therapy Putty. Bleed proof, nontoxic, clean and non-oily, Therapy Putty leaves no residue and won't fragment, separate, stain or stick to skin. Six distinct colors reflect established standards in resistive exercise: progress from super soft tan to extra firm gray. Putty can be squeezed, stretched, twisted or pinched to meet a wide range of strengthening needs, or used to encourage heel strike and strengthen foot muscles. Combine colors to create custom resistance to meet individual needs. Nontoxic. Latex free.

Clean & Fresh

Sammons Preston® Micro-Fresh™ Putty. Ultra-Fresh®—an EPA-registered antibacterial, antifungal and antimicrobial agent—provides odor protection and makes Micro-Fresh Putty last longer than standard putty. Adding Ultra-Fresh® enables the putty to resist the destructive, odor-causing growth of microbes, making Micro-Fresh putty nontoxic, clean and non-oily. To meet a wide range of strengthening needs for hands and feet, the putty can be squeezed, stretched, twisted or pinched. Five distinct colors reflect established standards in resistive exercise, and patients can combine colors to create custom levels. Latex free.
