

Shiley™ tracheostomy tubes, cuffless, with inner cannula

CFN

LGT

- 6A. Tracheostomy tube, cuffless, with inner cannula, fenestrated (CFN) is designed for pulmonary hygiene and, when used in conjunction with the Decannulation plug (DCP), directs breathing through the upper airway.
- 6B. Laryngectomy tube (LGT) is made with high-quality, compliant material and is a convenient alternative to metal tubes.
- a. Inner cannula with integral 15 mm twist-lock connector.
 - b. Cannula with open lumen and low-profile connector reduces bulk at stoma. (Caution: Low profile inner cannula is not adaptable to ventilator equipment.)
 - c. Obturator.
 - d. Decannulation plug (DCP) closes the proximal end of the CFN to permit breathing through the fenestration and upper airway.
 - e. Fenestrated inner cannula with green 15 mm connector and white 15 mm cap.
 - f/g. Inner cannula with low-profile connectors.

SIZE	PRODUCT DESIGNATION	I.D.	O.D.	LENGTH	QTY PER BOX	
4	4CFN	5.0 mm	9.4 mm	65 mm	1	CFN
6	6CFN	6.4 mm	10.8 mm	76 mm	1	
8	8CFN	7.6 mm	12.2 mm	81 mm	1	
10	10CFN	8.9 mm	13.8 mm	81 mm	1	
6	6LGT	6.4 mm	11.1 mm	50 mm	1	LGT
8	8LGT	7.6 mm	12.6 mm	50 mm	1	
10	10LGT	8.9 mm	13.7 mm	50 mm	1
