

Cardinal Health™ Incontinence Products

Truly breathable solutions for optimal skin health

Introducing BreatheEasy™ Technology

The fully breathable line of incontinence products from Cardinal Health allows you to breathe easy by promoting an optimal skin PH balance that helps keep skin flora at a healthy level.

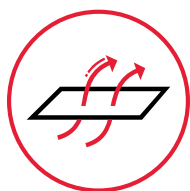

Our underwear, adult briefs and premium underpads with Cardinal Health™ BreatheEasy™ Technology are designed to be cooler and more comfortable*, improving skin health and providing dignity to those with incontinence.

A photograph showing two women in a bedroom setting. One woman, wearing a dark blue jacket, is leaning over a bed and holding a white, quilted incontinence product. The other woman, wearing a light blue long-sleeved shirt, is looking at the product. The bed has white pillows and a patterned blanket. A red banner is overlaid on the bottom left of the image.

For skin. For dignity. For life.

BreatheEasy™ Technology explained

Breathability is essential to healing

When skin flora is out of balance due to excessive heat and moisture, it can lead to serious skin problems and make it difficult to treat wounds. You can help provide a cooler, drier and more comfortable microclimate that promotes optimal skin health by using products designed for maximum breathability.

With patented BreatheEasy™ Technology, our product line features two types of breathability: **Air-permeable breathability** allows air to pass through the material, and **moisture-vapor-permeable breathability** allows water vapor to pass through the material.

Three zones of breathability

Air-permeable

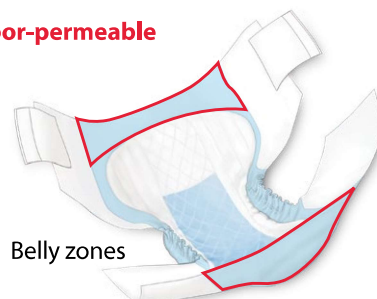

Wing zones

Moisture vapor-permeable

Core zone

Belly zones

Our adult briefs are breathable in three zones instead of just one. The **wing zone** is air-permeable. All traditional briefs are breathable in this area to meet National Association for Continence (NAFC) guidelines. The **belly zones** and **core zone** are moisture-vapor permeable, an advanced feature that many other briefs don't offer. This guide will demonstrate our full line of truly breathable incontinence products.

Quilted Briefs featuring BreatheEasy™ Technology

A cost-effective solution

Cardinal Health™ WINGS™ Traditional Quilted Briefs with added breathability offer a cost-effective solution with the following features:

- Improved rate of absorbency*, retention capacity, rewet and fluid control
- Breathable side panels minimize heat build-up
- Super absorbent core locks in fluid and neutralizes odors

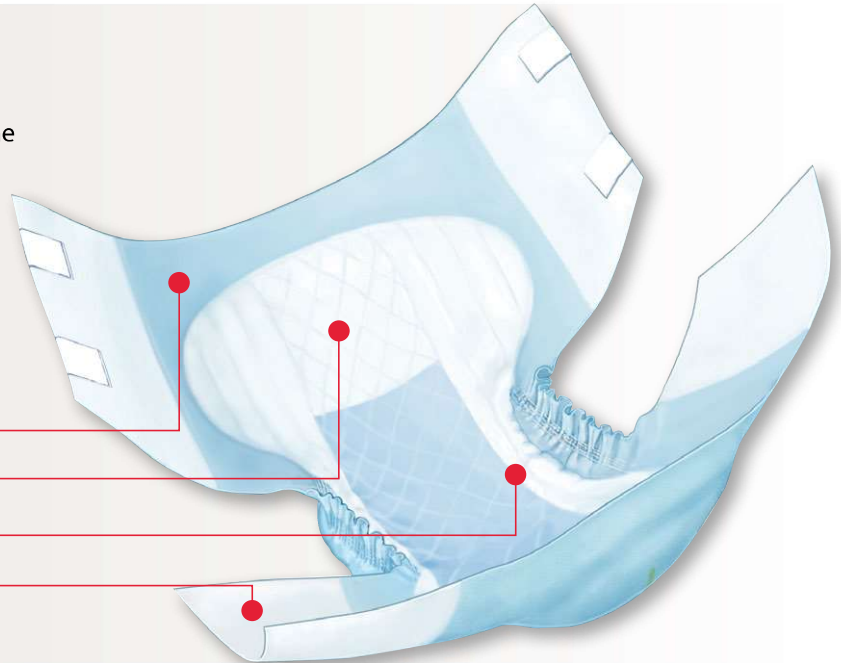

BreatheEasy™ Backsheet

Cores redesigned for integrity

Absorbency aligned with NAFC guidelines by level
