

Standard Percutaneous Endoscopic Gastrostomy (PEG) Kit

Product Features

High-Grade Silicone Dome-Bolstered PEG Tube

- Designed for performance and consistent flow
- Facilitates traction removal

Universal 1.9 mm O.D. x 240 cm Retrieval Snare

- Traverses scopes with a 2.0 mm or larger working channel
- Universal-sized snare, intended to eliminate the cost of a specialty snare

Double-Tier Tray Packaging

- Kit organization promotes procedural efficiency

External Bolsters

- Two external bolster options: accommodates physician and patient needs: Round; T-Bar

Multiple Sizes and Accessories

- Multiple French sizes for broad patient coverage
- Separate feeding ports
- C-Clamp designed to help reduce risk of tube reflux and leaking
