According to a study conducted by the \*University of Michigan...

**Workers are overwhelmingly positive about having OTC medications in the workplace.**

#### \*University of Michigan Study Findings:

- The workers surveyed reported visiting their company health/medical department on average 10 times per year.
- The top four worker complaints that occurred while on the job were headaches, colds/sinus problems, muscle ache/pain, and burns.
- 73 percent of those surveyed regularly experienced headaches and cold and sinus symptoms while at work.
- More than half (55 percent) of those surveyed experienced muscle and joint pain at work.
- Almost half (46 percent) of employees experienced cuts and burns on their skin while on the job.
- 89 percent of those surveyed believed the over-the-counter medications provided by the company helped them feel well enough to complete their shifts.
- Employees strongly agreed with the statement: "I highly recommend having over-the-counter medications available to workers in other work sites that currently do not have over-the-counter medications in place."
