Promote patient independence

A.

B.

C.

D.

E.

Assistive Dining Plates help promote patient independence and provide a more enjoyable dining experience by reducing the challenges of eating and increasing meal intake. The high-contrast background of **Red Dinnerware (Hi-Sided Plate only)** makes food more visible and visually appealing, helping to improve food intake. **3-Compartment Divided Plates** conveniently keep foods separated while **Inner Lip Plates** keep food contained and help prevent spills, which can cause slips. **High-Sided Scoop Dishes** and **Hi-Sided Plates** assist in sliding food onto utensils for patients with decreased motor skills or use of only one hand, and the outer lip makes the plate easier to grasp. Nonslip bottoms. **Translucent Lids** (sold separately below) provide temperature control and quick identification of foods.

Freezer-, microwave-, dishwasher-safe • Made in the USA • All Plates: Polycarbonate construction
• **3-Compartment/Inner Lip:** 1½"H sides x 8¾" diam.
• **High-Sided Scoop:** 1½"-2"H sides x 8¾" diam.
• **Hi-Sided Plate:** 1¾"H sides x 7¾" diam.; ½"-thick outer lip • **Translucent Lid:** 1½"H sides x 9" diam.
• Plastic
