

AG7178

Final Bacterial/Viral Filter

The AG7178 expiratory filter provides an additional line of defense against bacteria, viruses, and allergens that often plague CPAP/BiPAP and Ventilator patients. This disposable, single patient use filter is designed to clean the outgoing air from Ventilators, CPAP, and BiPAP machines. It provides safe and effective filtration, helping patients breathe more naturally.

- Helps protect against viruses and bacteria
- Simple and safe design
- Works with most models
- Connections:
 - ◇ Patient Side: 15mm I.D./22mm O.D.
 - ◇ Out: 22mm I.D.

FILTRATION PERFORMANCE

Part Number	UOM	Filter Type	Filter Media	NaCl	BFE	VFE
