

Cardinal Health™ Manuka Honey Barrier Cream

What's the buzz?

Medical-grade Manuka honey has been used in traditional wound healing due to a variety of characteristics, including⁽¹⁾:

Anti-inflammatory properties

Antimicrobial properties

Ability to maintain moist wound conditions

High viscosity that helps provide a protective barrier

What it is: A skin barrier with Manuka Honey designed to protect the skin

Used for: Protecting at-risk skin

Ideal for: Temporary protection of minor burns, cuts and scrapes. Dries the oozing and weeping of poison ivy, poison oak and poison sumac. Temporary relief from skin irritations caused by urine, diarrhea, perspiration, fistula drainage, feeding tube site leakage, wound drainage (peri-wound skin), anorectal itching and chafing. May provide cooling sensation.

Active ingredient: 20% Zinc Oxide and 0.1% Menthol

Key ingredient: Manuka Honey

What's not in the product: Dyes, fragrances, alcohol, phthalates, sulfates, triclosan, 1,4-Dioxane and Q-15

Not CHG compatible
