Simple early warning system to help prevent falls.

Bed and chair sensor pads alert caregivers whenever pressure is removed from the sensor pad (i.e. when a resident gets up from a bed or chair and pressure is removed from the pad).

Floor Mats & Landing Mats alert caregivers when pressure is applied to the sensor mat (i.e. when a resident steps onto a floor mat and pressure is placed on the mat).

Floor mats are ideal for bedside and doorway mobility monitoring. Bed and chair pads are ideal early warning alerts of resident mobility as they exit beds and chairs.
