Kendall™ Skin Wellness System

COVIDIEN

Kendall™ Skin Wellness System

Skin is the body's natural barrier. Excessively dry or wet skin is compromised in its ability to act as an effective barrier to moisture, irritants and microorganisms. Perineal skin is particularly susceptible to damage commonly associated with incontinence. With proper cleansing, moisturizing, protection and treatment, compromised skin can be protected from further damage and healthy skin will maintain its natural barrier properties. Covidien offers a full skin wellness system to cleanse, moisturize, protect and treat skin. When used together, this system can relieve the damage commonly associated with incontinence.

Cleanse. Moisturize.

*A full system of care
for skin wellness...*

Jojoba

Science and nature together

Products in the Kendall™ Skin Wellness System contain jojoba oil. The jojoba plant (*Simmondsia chinensis*) is native to the southwestern United States and the oil is derived from the plant's seed. Jojoba oil penetrates the surface layers of the skin and repeat applications enhance the moisturizing effect of the oil. Jojoba oil restores essential moisture to the skin when natural oils have been diminished from water loss or exposure to irritants.

A history of skin wellness

For over 100 years, Kendall wound care products have been trusted by healthcare providers around the world. Today, the Kendall name is not only synonymous with a legacy of wound healing products, but it also stands for innovation in wound management.

Wings™ and Sure Care™ incontinence management products have been comfortable, dignified solutions for incontinence care for decades. Most importantly, these highly absorbent products promote an environment that minimizes exposure to factors that contribute to skin breakdown.

Protect. Treat.

Cleanse

The use of traditional soap and washcloth tends to dry skin and raise pH. An alkaline environment can irritate the skin and promote bacterial overgrowth. Skin irritation can contribute to the loss of the superficial layers of the skin. Damage to the superficial skin layers increases the risk of dermatitis and secondary skin infections.

The Kendall™ Skin Wellness System includes two no rinse cleansing options for gentle removal of dirt and irritants.

Body Wash & Shampoo

A gentle no rinse cleanser for the hair, body and perineal area

- Contains jojoba oil to restore moisture to compromised skin
- Hypoallergenic, pH balanced formula
- Available in 5 fl oz and 9 fl oz foaming bottles

2-in-1 Cleanser

A no rinse skin cleanser and moisturizer in one step

- Contains 1.5% dimethicone, vitamin E and jojoba oil
- Cleanses and protects the skin from damage associated with incontinence in one step
- Dimethicone and jojoba oil restore moisture to compromised skin
- Hypoallergenic, pH balanced formula
- Available in 4 fl oz and 8 fl oz spray bottles

Moisturize

Healthy skin acts as a barrier to water, irritants and microorganisms that commonly come into contact with the skin. Extremely dry skin or excessively wet skin that has been stripped of its natural oils lacks the capacity to maintain proper fluid levels.

The Kendall™ Skin Wellness System includes a moisturizing lotion and two moisture barrier products that replace the skin's natural oils and act as a barrier to moisture and other skin irritants. All are formulated to be hypoallergenic, pH balanced and are available in 2 fl oz and 4 fl oz tubes.

Moisturizing Lotion

A light moisturizer that absorbs quickly

- Contains 1.5% dimethicone, vitamin E and jojoba oil
- Replaces oils in the skin lost from exposure to moisture or excessive dryness
- Promotes skin's effectiveness as a natural barrier to moisture and other irritants

Moisture Barrier Cream

A light moisture barrier that spreads easily and allows visibility to the skin beneath

- Contains 5% dimethicone, vitamin E and jojoba oil
- Acts as a barrier to moisture and irritants when the natural barrier ability of the skin has been compromised

Soothing Ointment

A zinc oxide and petrolatum based ointment that spreads easily and provides a durable, visible barrier for the skin

- Contains 10% zinc oxide, vitamin E and jojoba oil
- Acts as a barrier to moisture and irritants when the natural barrier ability of the skin has been compromised

All moisturizing formulations are also available in a single dose 4 mL packet

Protect

As a natural barrier, the skin is one of the body's first lines of defense against microorganisms that can cause infection. When the surface of the skin has been damaged from exposure to excessive moisture or other irritants, it is more permeable and easily colonized by harmful microorganisms. The Kendall™ Skin Wellness System includes an antimicrobial cleanser that removes dirt and irritants from the skin and protects against microbial contamination in one step.

Antimicrobial Cleanser

A no rinse skin cleanser and antimicrobial wash in one step

- Contains 0.13% benzalkonium chloride
- Shown in in-vitro studies to be effective against bacteria and fungi that can cause secondary infection and are commonly found in a clinical setting
- Hypoallergenic, pH balanced formula
- Available in 4 fl oz and 8 fl oz spray bottles

Effective Against*

Staphylococcus aureus
Pseudomonas aeruginosa
Escherichia coli
Acinetobacter baumannii
Candida albicans
Candida glabrata
Corynebacterium sp.
Enterobacter aerogenes
Enterococcus faecalis
Enterococcus faecium
Klebsiella pneumoniae
Klebsiella oxytoca
Propionibacterium acnes
Proteus mirabilis
Serratia marcescens
Staphylococcus epidermidis
Streptococcus pyogenes

Treat

Skin that has been compromised by excessive moisture or water loss is susceptible to secondary infection. Fungal infections are common in the perineum, where the skin tends to be warm and moist; an environment in which fungi thrive. The Kendall™ Skin Wellness System includes an antifungal cream with miconazole nitrate, a medication that is commonly used to treat fungal infections of the skin.

Antifungal Cream

A light cream that spreads easily and allows visibility to the skin beneath

- Contains 2% miconazole nitrate, vitamin E and jojoba oil
- Effective relief for the itching, soreness and irritation associated with jock itch (tinea cruris), athlete's foot (tinea pedis) and ringworm (tinea corporis)
- Hypoallergenic, pH balanced formula
- Available in a 4 fl oz tube
