Allscripts Homecare™

Supply Import: Streamlined Ordering, Smarter Supply Decisions

Allscripts has streamlined supply charge imports for homecare organizations using the Allscripts Homecare Solution. This supply import solution streamlines the supply charge data entry process after supplies have been fulfilled, and relieves you and your staff from the time-consuming, data-intensive, error-prone aspects often associated with manual homecare supply ordering.

Once a supply order is placed, no rekeying is necessary, saving staff time. Each morning, the prior day's orders are electronically configured and consolidated into one report, exported out of the supply vendor's system to be imported into the Allscripts system. You have the convenience of just one click to import and verify.
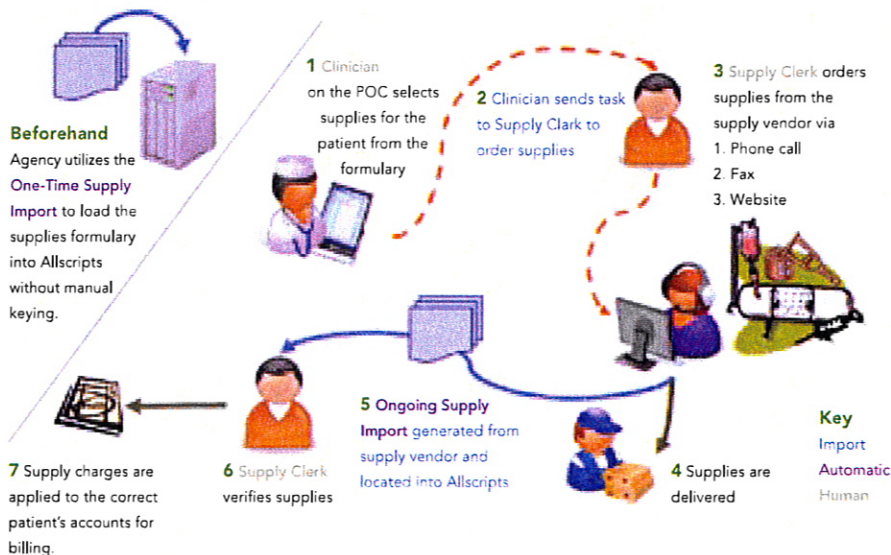

Key Features:

- Product Management
- Distribution Management
- Spend Management
- Performance Management

Key Benefits:

- Relieves you and your staff from the time-consuming, data intensive, error-prone aspects often associated with manual homecare supply ordering
- Saves time with less dependence on people keying in information
- Promotes billing and reporting accuracy

Supplies Import Workflow

Beforehand
Agency utilizes the **One-Time Supply Import** to load the supplies formulary into Allscripts without manual keying.

1 Clinician on the POC selects supplies for the patient from the formulary

2 Clinician sends task to Supply Clark to order supplies

3 Supply Clerk orders supplies from the supply vendor via
1. Phone call
2. Fax
3. Website

5 Ongoing Supply Import generated from supply vendor and located into Allscripts

4 Supplies are delivered

Key
Import
Automatic
Human

7 Supply charges are applied to the correct patient's accounts for billing.

6 Supply Clerk verifies supplies

Allscripts™

GROVE MEDICAL, INC.

Grove Medical web-based portal, "GroveConnect" shares data bi-directionally between Allscripts and Grove Medical order management system utilizing the Allscripts Supplies Import. GroveConnect was designed as a solution for improving clinical quality of care, improved workflows, cost reduction and operational control for home care and hospice organizations. GroveConnect is a completely, integrated web-based order management software solution allowing clinicians to enter patient orders using predefined formularies. At a glance, clinicians can review orders and order history for each patient. The GroveConnect EDI transactions and Allscripts Supplies Import eliminates rekeying of patient orders, acknowledgements and invoice data in Allscripts for patient order tracking and billing.

GroveConnect includes functionality for setting up business rules within the order entry process for managing clinician patient orders and controlling cost, meeting Medicare billing requirements.

- Allows clinicians to quickly place accurate orders keeping patient care on track
- Reduces car stock, eliminates closet inventory, avoids overstock or product shortages
- Eliminates rekeying, data entry errors and provides dramatic process efficiency
- Speeds home care claim reimbursement
- Reduces administrative tasks allowing focus on patient care and clinical documentation
- Improves workflow efficiencies and optimizes operations
- Reduces cost, increase revenues and profitability

Grove Medical experience and support with Allscripts Homecare Supplies Import includes:

- Single one-time load of the supply formulary to Allscripts Homecare Supply Data Definition file
- On-going hourly patient and clinician export/import used to synchronize data
- On-going hourly 850 EDI purchase order transaction to Allscripts
- On-going hourly 855 EDI Order Acknowledgment transaction to Allscripts
- On-going hourly 810 EDI Invoice transaction to Allscripts
