

Next Generation Briefs™

Prevail® Next Generation Briefs™ with Microclimate Care™

Prevail® Next Generation Brief™ (NGB™) with Microclimate Care™ is a revolutionary adult incontinence product that recognizes the importance of creating a favorable microclimate. By using a combination of advanced performance features the Prevail NGB™ more effectively reduces moisture/humidity from the skin surface while also helping to maintain normal skin temperatures. Other adult incontinence products may claim dryness and breathability but the Prevail NGB™ with Microclimate Care™ uses advanced materials and engineering innovation to achieve superior dryness and breathability with overall better clinical outcomes.

Prevail® Microclimate Care is Prevail's system of creating a favorable microclimate by incorporating performance features that help maintain normal skin temperature and moisture at the skin surface.

360° Breathable Zones™ – ventilated areas around the entire brief helps circulate air, allowing heat and moisture to be pulled away from the skin. Breathability helps maintain skin temperature and reduce perspiration and moisture. 360° Breathable Zones™ help reduce temperature & moisture.

Doublesorb™ Layers – dual core system with a lower storage core that locks up moisture and keeps it away from the skin. Doublesorb™ Layers help reduce moisture.

QUICK WICK® with MaxSoft™ – combines superior softness with first-class acquisition speed to pull moisture away from the skin faster. QUICK WICK® with MaxSoft™ Layer & dimple technology help reduce moisture.
